Body Lighting	Whelen Linear M-Series LED
Electrical System	CommandNET Multiplexed
Navigation System	Pioneer AVIC-940BT In Dash
Radios	Motorola CDM Series
Solar Panel	8A, 100W by BHA Solar

STANDARD ON EVERY VEHICLE

CommandNET is fully programmable and multiplexed with advanced features such as backlit message display module, audible alerts and complete monitoring capabilities for system wide control. CommandNET monitors ALL FastLane added components meaning that you will no longer have to ensure that the truck is plugged in or remove the radios from the portable chargers before parking it. CommandNET will monitor all loads and shut-down any item before the vehicle's battery system reaches critically low levels. Thus extending charging systems and battery life ensuring the vehicle is always "ready for service".

FEATURE DETAILS

Overhead Control Console

Exclusive to FastLane, overhead control console features color-keyed soft pile fabric to coordinate with OEM headliner. In addition to the floor console (also featured in this vehicle) the overhead control console houses the operator front control (switch) panel, system status message display, dual LED courtesy/map lights and three 5-watt speakers that terminate to the floor console for radios and equipment.

Custom Rear EMS Cabinet

Featuring FastLane's exclusive PolyBuild™ coating, this cabinet was purposed built for the customer. Additional features include heavy duty EMS supply drawer (on 300# slides), equipment roll-out tray, pull-out restocking and equipment checkout surface drawer with lower compartment storage (on 300# slides) and a heavy duty miscellaneous storage drawer (on 300# slides).

SolCharge™ 100W Solar Panel

This truck is officially GREEN. Featuring a 100W (8A @ 14V) solar panel with automatic, intelligent charging module. Whether parked and awaiting a call or on a run, this solar panel continuously produces (up to) 8A of charge current to assist in vehicle battery charging and to offset parasitic loads (such as portable radios and other charging EMS gear) ensuring ALL of your equipment is ready for service.
